

USMCA Cross-Border Impact:

Energy

- Zero Energy Trade in Energy Products**
Maintains the free flow of energy across borders in North-America through the continued zero-tariff treatment of U.S. energy exports to Mexico and Canada.
- Lock's in Mexico's Historic Energy Reforms**
Locks in for U.S. investors, service suppliers and other companies the benefits of Mexico's historic 2013 energy reform.
- Facilitates the Movement of Hydrocarbons by Pipeline**
Allows hydrocarbons transported through pipelines to qualify as originating, provided that any diluent, regardless of origin, does not constitute more than 40% of the volume of the good.
- Certification Requirements for Oil and Gas**
New flexibilities in rules of origin certification requirements for oil and gas moving between the U.S., Mexico, and Canada.
- Streamlined Regulatory Process for U.S. LNG Exports to Mexico and Canada**
U.S. liquefied natural gas exports to Mexico and Canada will continue to receive automatic export approvals, whereas exports to non-FTA partners require a determination that they are in the public interest.
